

Week05Day02=> Document QA Agent

Created Work Flow:

-> Manual Trigger: Chat Trigger

-> Read/Write Files from Disk: Stored the file to be read

-> Extract from File: extracts content from the file uploaded

-> Basic LLM: ICEPOT Prompt provided to answer for the question asked only from the extracted content of the file uploaded with "Groq chat model – openai/gpt-oss-120b" support.

**question is passed down from chat trigger to Basic LLM PROMPT directly

The screenshot shows the configuration panel for the 'When chat message received' trigger. The 'Parameters' tab is active, displaying the 'Chat URL' as `http://localhost:5678/webhook/a245975f-9ba8-4ef3-9c83-09ca7c99b5c7/chat`. The 'Settings' tab is also visible. The 'Open chat' button is present. The 'Make Chat Publicly Available' toggle is turned on. The 'Mode' is set to 'Hosted Chat'. A message states: 'Chat will be live at the URL above once this workflow is published. Live executions will show up in the 'executions' tab'. The 'Authentication' is set to 'None'. The 'Initial Message(s)' field contains: 'Hi there! 🌟 My name is Nathan. Please upload the file before seeking answer.' The 'Options' section has the 'Allow File Uploads' toggle turned on and an 'Add Field' button.
