

Browser Extension Enhancement

Enabling Playwright – Typescript code generation:

Adding additional model under Groq LLM:

src > scripts > JS popup.js > ...

5 document.addEventListener("DOMContentLoaded", async () => {

110 return;

111 }

112

113 const providerSelect = document.getElementById("providerSelect");

114 const modelSelect = document.getElementById("modelSelect");

115 const groqApiKeyInput = document.getElementById("groqApiKey");

116 const openaiApiKeyInput = document.getElementById("openaiApiKey");

117 const testleafApiKeyInput = document.getElementById("testleafApiKey");

118 const inceptionlabsApiKeyInput = document.getElementById("inceptionlabsApiKey");

119

120 });

121

122 // Model options by provider

123 const modelsByProvider = {

124 groq: {

125 { value: "openai/gpt-oss-120b", label: "openai/gpt-oss-120b" },

126 { value: "openai/gpt-oss-20b", label: "openai/gpt-oss-20b" },

127 { value: "qwen/qwen3.8-27b", label: "qwen/qwen3.8-27b" },

128 },

129 openai: {

130 { value: "gpt-4o", label: "GPT-4o" },

131 { value: "gpt-4o-mini", label: "GPT-4o Mini" },

132 },

133 inceptionlabs: {

134 { value: "mercury-2.5", label: "Mercury 2.5" },

135 { value: "mercury-2", label: "Mercury 2" },

136 { value: "mercury-edit", label: "Mercury Edit" },

137 },

138 };

139

140 // Function to update model options based on selected provider

141 function updateModelOptions(provider) {

142 modelSelect.innerHTML =

143 <option value="" disabled selected>Select the model...</option>;

144

145

Project code review for enhancements

implement "qwen/qwen3.8-27b" model under Groq as another option without disturbing the existing code

Exact change

In = popup.js , the Groq array now includes:

- qwen/qwen3.8-27b

And in = pricing.js , the Groq pricing map includes the same model with a value:

- input: 0.10
- output: 0.40

Verification

I ran this syntax validation successfully:

Set location "d:\GenAI_Course\ai-extension-inception-ai updated (1)\ai-extension-updated"; node --check src/scripts/popup.js; node --check src/config/pricing.js

This completed with no errors, confirming the edited files are valid JavaScript.

If you want, I can also add a third or fourth Groq model in the same style or help you choose the best Groq model for this extension use case.
